

## SQL Server 7.0 Service Pack 4 (SP4) Installation Guide

---

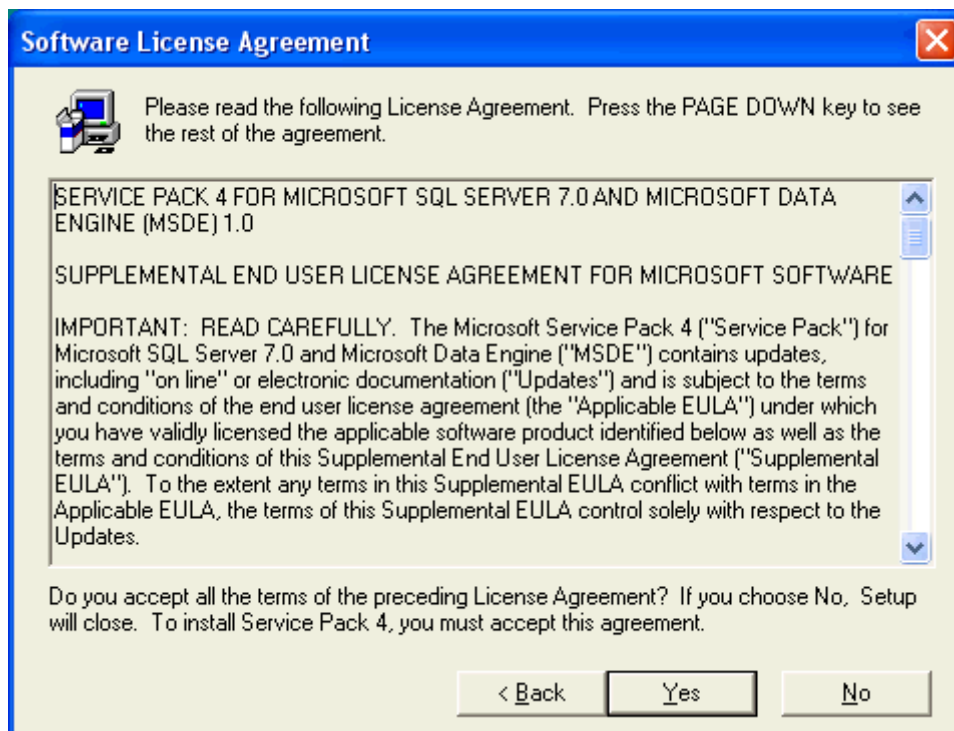

1. Insert the provided CD containing SQL Server 7.0 Service Pack 4 (SP4) or download the 41MB setup file from <http://www.microsoft.com/sql/downloads/sp4ENG.asp>
2. Extract the installation files to a temporary folder:

3. Run **Setup.bat** from the temporary folder.
4. Click **Next**

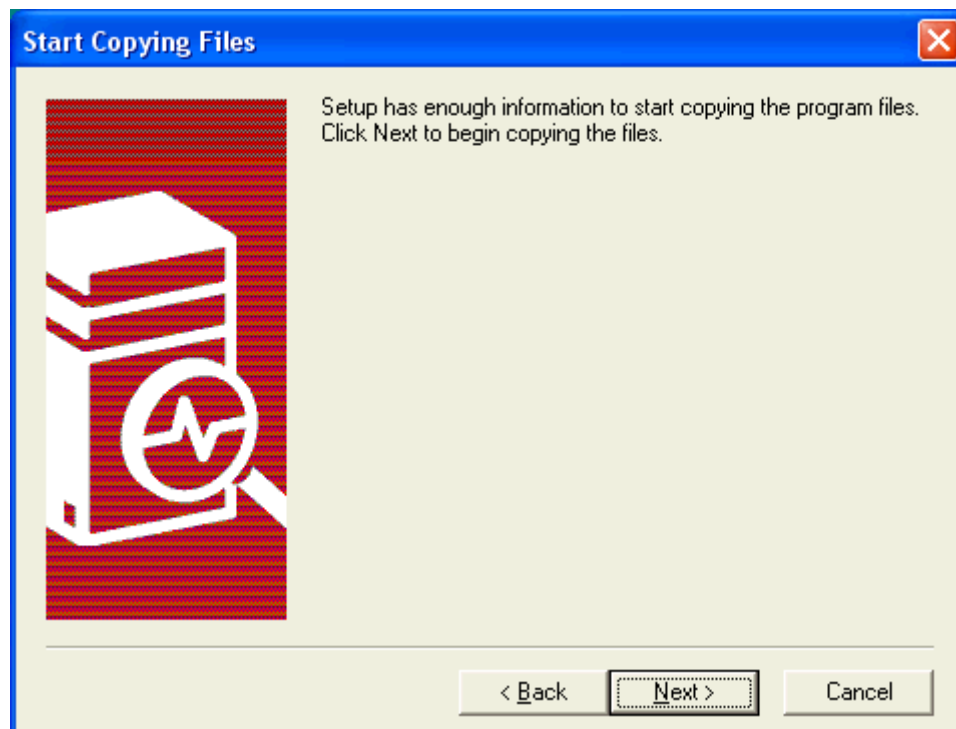

5. Click **Yes**

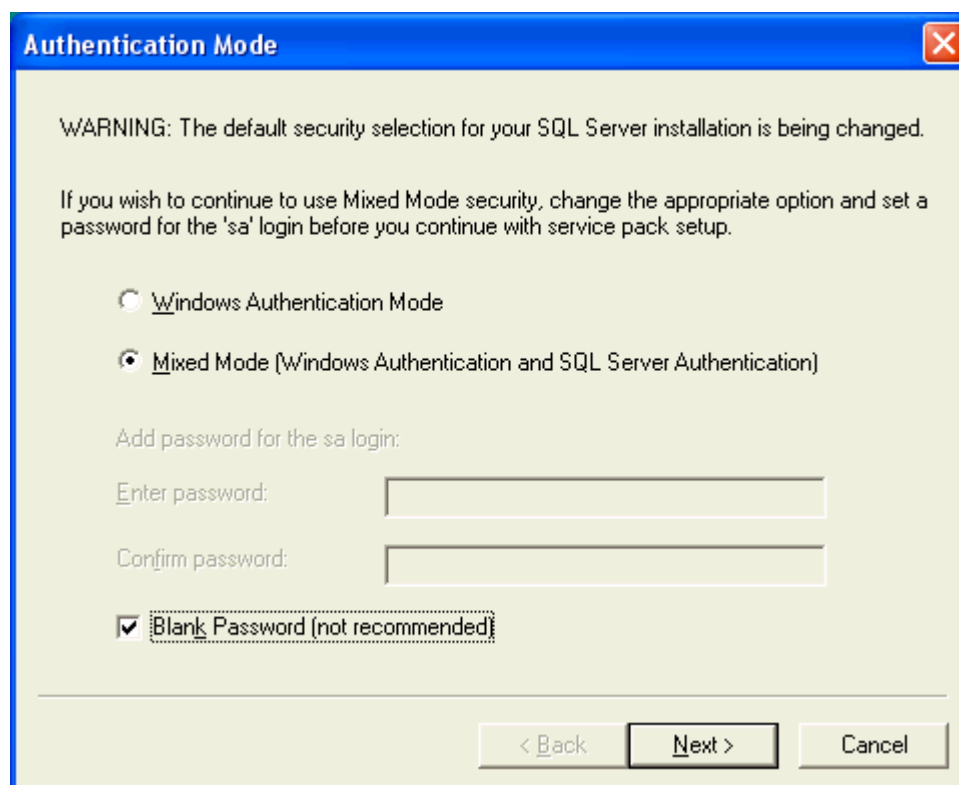

6. Select the **SQL Server system administrator login...**
7. Leave the password blank. [If you modified the SQL settings using the Advanced option during install you may need to type your **sa** password now – note: this is not the same as your SmartLink 2002 password].

8. Once your password has been verified click **Next** to continue. [Setup will stop your SmartLink 2002 Server and Database then install 8 components of the upgrade].

9. Select **Mixed Mode**
10. Tick **Blank Password**
11. Click **Next**

12. Select **Yes, I want my computer to restart** then click **Finish**. [The computer will reboot and SmartLink 2002 Server will automatically re-load completing the SP4 upgrade to SQL Server].
